## Citation for Dr. Navin C. Nanda

*Dr. Nanda is Distinguished Professor of Medicine and Cardiovascular Disease at the University of Alabama at Birmingham USA. He is a nationally and internationally renowned cardiologist and echo-cardiologist whose pioneering contributions have changed the way cardiology is practiced in the world to-day. He was the first to discover the pulmonary valve by echocardiography, diagnose bicuspid aortic valve by echo, invent treadmill exercise echocardiography, introduce color Doppler in the USA, invent trans-pharyngeal and trans-gastric ultrasound, develop the technique of three dimensional Tran's esophageal echocardiography as well as pioneer the use of echocardiography in cardiac pacing and electrophysiology.*

*For his pioneering inventions he received the Ellis Island Medal of Honour sanctioned by the US Congress and the American College of Cardiology's International Service Award for being a role model for others to follow him in his footsteps and for enhancing cardiovascular care throughout the world.*

*Dr. Nanda has received several awards, fellowships and various felicitations from innumerable international cardiology societies of Asia, Europe and USA. Dr. Nanda has over 1000 publications to his credit including 8 books, 3 of which have been translated into Italian, French, German and Turkish languages and 6 video text books and Cd's.*

*It is with humility in the spirit of wonderment and admiration in recognition of Dr. Nanda's commendable contributions in Echocardiography and cardiology, the RUHS in its Second convocation proudly confers on Dr. Navin C. Nanda the Degree of Doctor of Science [honoris causa] on this day of 2nd Feb, 2015*
